Get API Key

Treat like password

The screenshot shows a browser window titled "Get API key | Google AI Studio" at the URL "aistudio.google.com/app/apikey". The interface is dark-themed. On the left sidebar, there's a "Get API key" button, a "Create new" button, and a "New tuned model" section. Below that are "My library" and "No prompts yet" sections. Further down are "Getting started", "Documentation", "Prompt gallery", and "Discord community" sections. At the bottom of the sidebar are "Build with Vertex AI on Google Cloud" and "Settings" sections. The main area is titled "API keys" and contains a message about creating a new project or adding API keys to an existing one, subject to Google Cloud Platform Terms of Service. A "Create API key" button is present. A modal window titled "Create API key" is open, prompting the user to select a project from existing write-access Google Cloud projects. A search bar shows the project "gen-lang-client-0598043526". A blue button at the bottom of the modal says "Create API key in existing project".

Road to Google Developers Certification

Create new

- Chat prompt
- Freeform prompt
- Structured prompt

The screenshot shows the Google AI Studio interface. On the left, a sidebar lists options: 'Get API key' (disabled), '+ Create new' (highlighted with a yellow arrow), 'Chat prompt' (disabled), 'Freeform prompt' (disabled), and 'Structured prompt' (disabled). Below the sidebar are links for 'Documentation', 'Prompt gallery', and 'Discord community'. A modal window titled 'Get API key' is open, containing the '+ Create new' button, which is also highlighted with a yellow box. To the right of the modal, there is a message about adding API keys to a project, a link to manage your project and API keys in Google Cloud, and a table showing a single entry: 'Agent' (Created: Mar 22, 2024). At the bottom of the modal, there is a code snippet for generating content using the Gemini API:

```
curl \  
  -H 'Content-Type: application/json' \  
  -d '{"contents": [{"parts": [{"text": "Write a story about a magic backpack"}]}]}' \  
  -X POST 'https://generativelanguage.googleapis.com/v1beta/models/gemini-pro:generateContent?key=YOUR_API_KEY'
```

Write a short, engaging blog post based on this picture. It should include a description of the meal in the photo and talk about my journey meal prepping.

Meal prepping is a great way to save time and money, and it can also help you to eat healthier. When you meal prep, you cook a large batch of food ahead of time and then portion it out into individual meals. This makes it easy to grab a healthy meal on the go, even when you're short on time.

There are many different ways to meal prep, but I find that the easiest way is to cook a big batch of protein, vegetables, and grains. I then divide the food into individual containers and store them in the refrigerator or freezer. When I'm ready to eat, I simply grab a container and heat it up.

One of my favorite meal prep recipes is this teriyaki chicken and brown rice bowl with roasted vegetables pictured above. It's a healthy and satisfying meal that's perfect for busy weeknights.

To make this meal, I start by cooking the brown rice. While the rice is cooking, I marinate the chicken in a mixture of teriyaki sauce, soy sauce, and garlic. I then cook the chicken in a skillet until it's cooked through.

Once the chicken is cooked, I add the vegetables to the skillet and cook them until they're tender. I then serve the chicken and vegetables over the brown rice.

This meal is easy to make and it's very versatile. You can use any type of protein or vegetables that you like. You can also adjust the amount of teriyaki sauce and soy sauce to suit your taste.

Run Preview 291 / 12,288

Structured Prompt

Marketing description

Table-based interface for
more complex model
priming and prompting

The screenshot shows the "Marketing description writer" application from Google AI Studio. The interface is designed for generating marketing descriptions based on product images and target audiences. It features a sidebar with various icons for file operations like copy, paste, and search. The main area displays two examples of generated marketing descriptions:

INPUT Product Image:	INPUT Target Audience:	OUTPUT Marketing Description:
	Mid-aged men	Introducing the epitome of power and sophistication - the sleek and captivating sports car. It's more than just a car; it's a symbol of your passion for life and your unwavering commitment to excellence. Embrace the thrill and indulge in the ultimate driving pleasure.
	Environmentalists	Looking for a sustainable and eco-friendly way to get around? Look no further than this black bicycle. Biking is a great way to reduce your carbon footprint and improve your health at the same time. If you're an environmentalist, there's no better way to get around than by

Below this, there's a section titled "Test your prompt" with a single example:

INPUT Product Image:	INPUT Target Audience:	OUTPUT Marketing Description:
	Athletes	Run to get output

At the bottom, there are buttons for "Run" and "Preview". On the right side, there's a panel titled "Run settings" with options for "Model" (set to Gemini 1.0 Pro Visor), "Temperature" (set to 0.9), and "Safety settings". A yellow box highlights the "Get code" button in the top right corner.

Get Code

- Choose Language
- Open in Colab
- Copy to Editor

The screenshot shows the "Marketing description writer" interface in Aistudio Google. At the top, there's a toolbar with icons for Save a copy, Get code, and other options. Below the toolbar, a sidebar on the left contains icons for various functions like Insert, Run settings, and Reset. The main area has a title "Marketing description writer" and a subtitle "Given an image of a product and its target audience, write an engaging marketing description". A message box says "2 / 500 examples" and "Get code". A modal window titled "Create your API key before using the code in your project" is open, containing instructions and code snippets for different languages (cURL, JavaScript, Python, Android (Kotlin), Swift). The Python tab is selected, showing the following code:

```
38 model = genai.GenerativeModel(model_name="gemini-1.0-pro-vision-latest",
39                                 generation_config=generation_config,
40                                 safety_settings=safety_settings)
41
42 # Validate that an image is present
43 if not (img := Path("image0.jpeg")).exists():
44     raise FileNotFoundError(f"Could not find image: {img}")
45
46 image_parts = [
47     {
48         "mime_type": "image/jpeg",
49         "data": Path("image0.jpeg").read_bytes()
50     },
51     {
52         "mime_type": "text/plain",
53         "data": "Athletes"
54     }
55 ]
```

At the bottom, there's a preview section showing a basketball icon and the text "Athletes". Buttons for "Run" and "Preview" are visible.

```

Week 5

Study Group

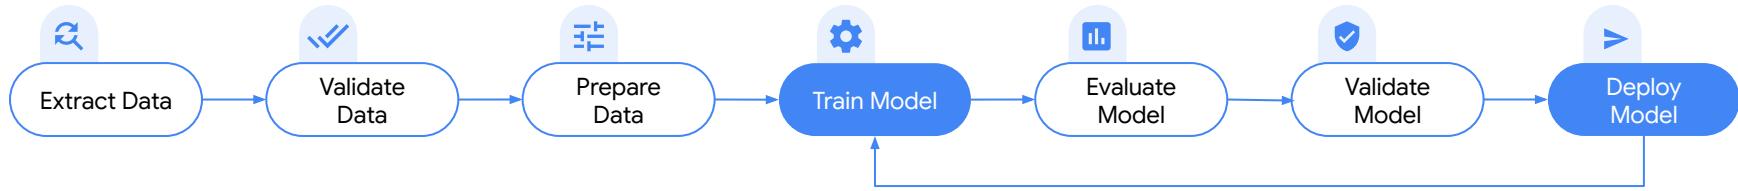

ML Pipeline Automation & Orchestration

- Design pipeline.
- Implement training pipeline.
- Implement serving pipeline.
- Track and audit metadata.
- Use CI/CD to test and deploy models.

ML Solution Monitoring, Optimization, and Maintenance

- Monitor ML solutions.
- Troubleshoot ML solutions.
- Tune performance of ML solutions for training & serving in production.

Pipelines automate the training and deployment of models

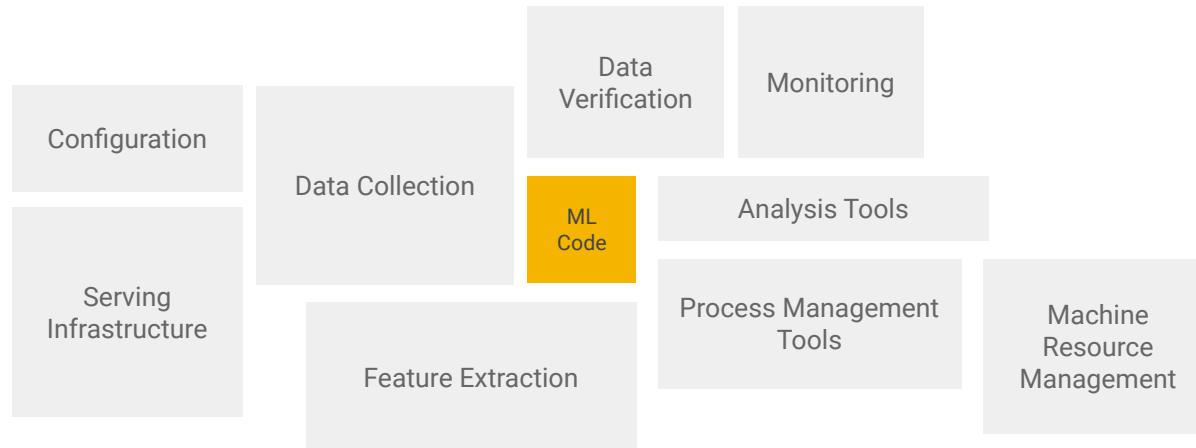

From DevOps to MLOps

- **Continuous Integration (CI)** is no longer only about testing and validating code and components, **but also testing and validating data, data schemas, and models.**
- **Continuous Deployment (CD)** is no longer about a single software package or a service, but a **system (ML training pipeline) that should automatically deploy another service (model prediction service).**
- **Continuous Training** is a new property, specific to ML systems, concerning automatically retraining and serving the models.

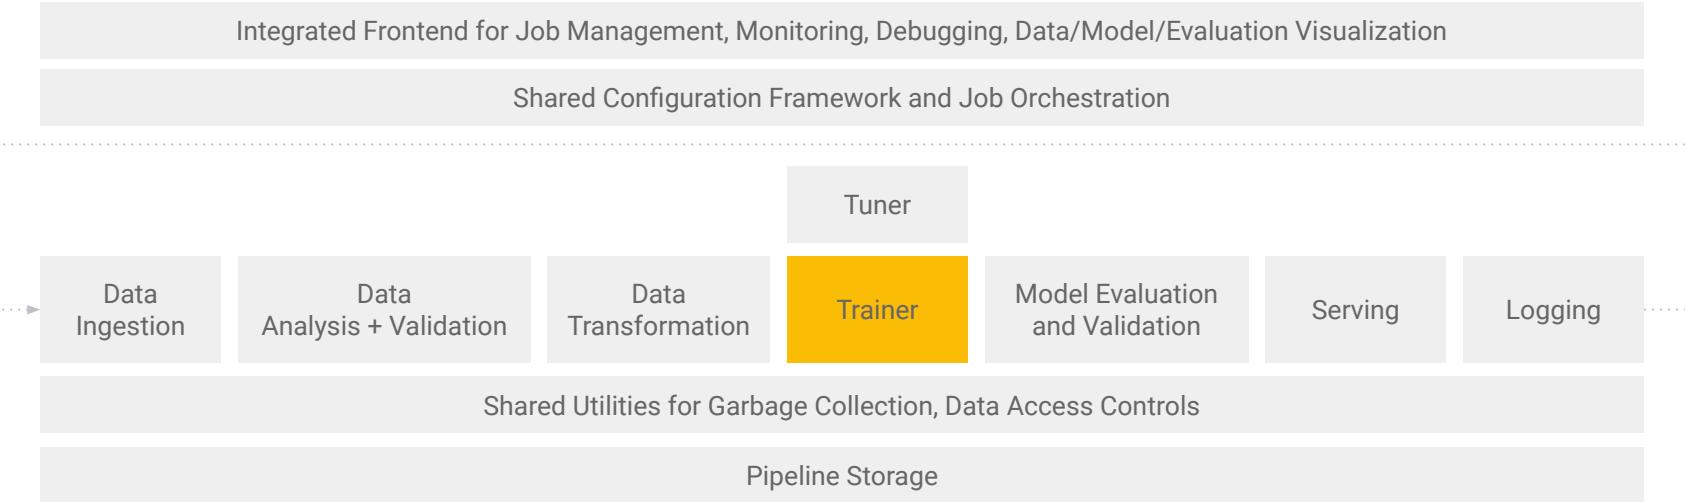

In addition to the actual ML...

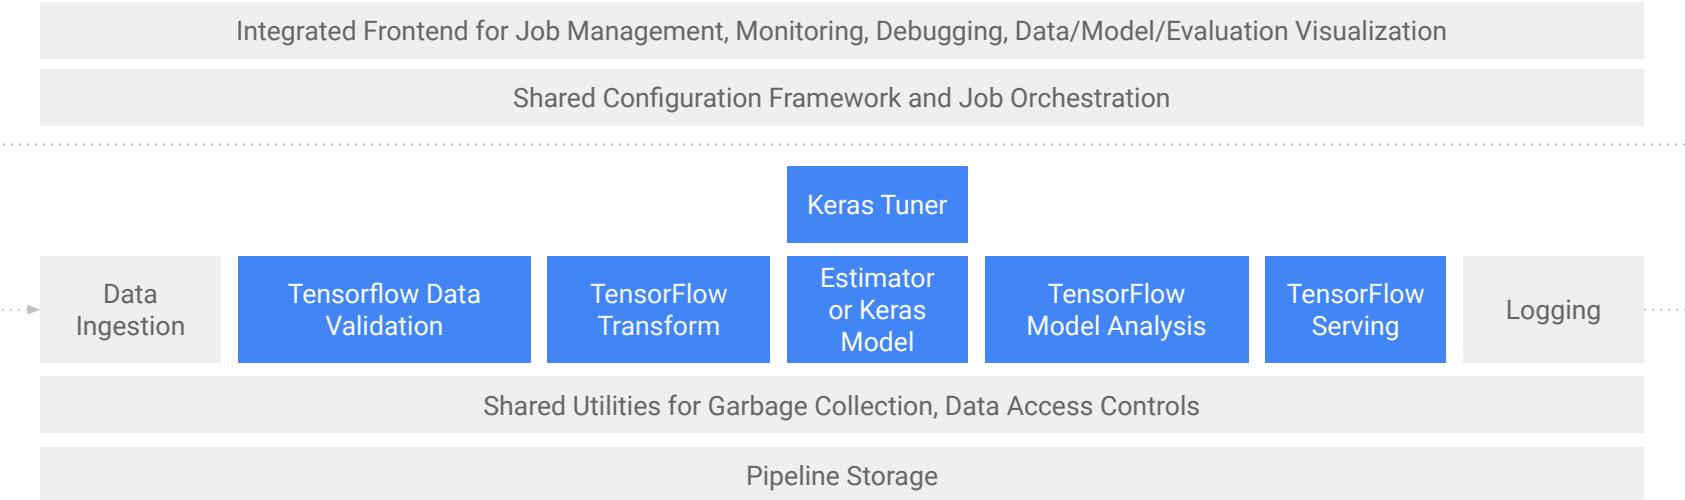

...you have to worry about so much more.

Deployment Strategies

Rolling Update

Canary Deployment

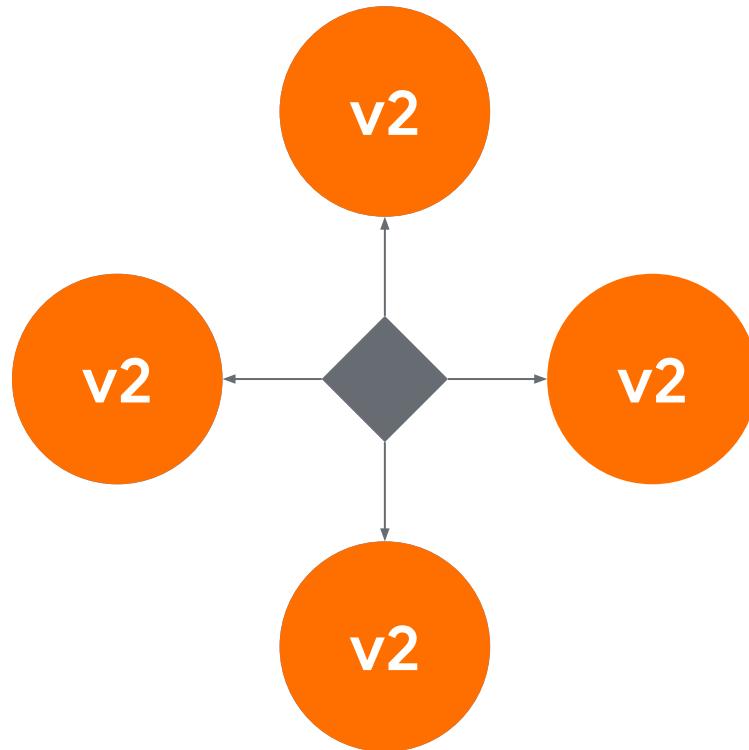

Blue-Green Deployment

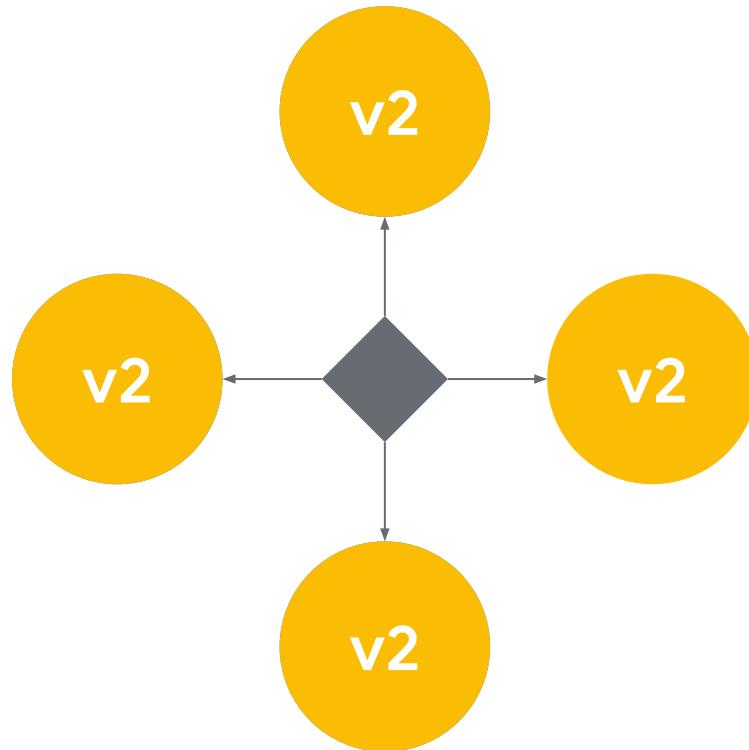

Rolling Update

- Slowly increasing number of NEW
- Slowly decreasing number of OLD

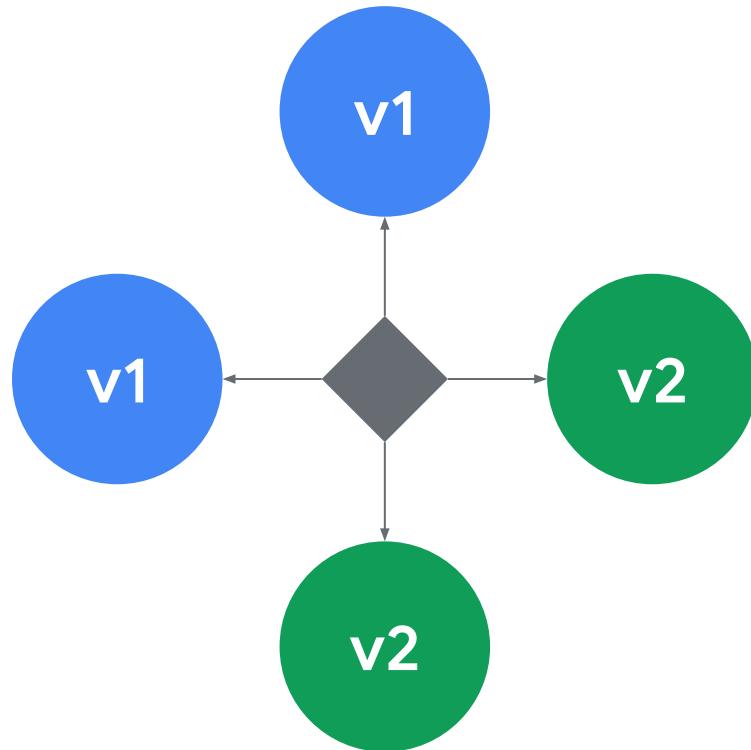

Canary Deployment

- Test on small SUBSET in production
- After testing, traffic shifts to NEW

Blue-Green Deployment

- 2 SEPARATE deployments
- After testing, switch traffic from OLD Blue to NEW Green.

Sample Questions Review
